

MEDIA RELEASE

Eagle Datamation International and Software Craft join forces

December 2004 – Logistics and International Trade software developer Eagle Datamation International (EDI) CEO Richard White and Software Craft Directors Leon Ball and Leigh Porter are proud to announce the merger of the two businesses.

Software Craft Directors, Leon Ball and Leigh Porter will be shareholders in EDI and take on roles as senior managers. Leon will be heavily involved in the development of the Customs products whilst Leigh will manage the customer relationships and assist with system design and project management.

CEO of EDI Richard White said, "We are pleased and proud to have two of the industry's most experienced developers joining us and we are totally committed to providing all our clients and the clients of Software Craft with a software platform that is unrivalled in Australia and the Asia Pacific and can compete strongly anywhere in the world."

Leon Ball and Leigh Porter added, "We welcome this opportunity to have access to the development resources and industry expertise of EDI and are convinced this merger will provide major future benefits to Software Craft's established client base. We will contribute our proven industry knowledge and IT development skills to the merged company to further strengthen the ediEnterprise software suite."

The merger of the two businesses provides an opportunity to bring the best features and capabilities of Software Craft's Scope product to EDI's powerful award winning ediEnterprise software suite. The company plans to support Software Craft's "Scope" product for some time.

As well as its award winning Forwarding and Customs components, EDI will bring new and powerful features and new modules to Software Craft clients such as: - ediShippingManager (Ships Agency), ediCFSManager (Unpack and Pack), ediWarehouseManager (Contract Warehousing) ediTransportManager (Local Transport), ediSalesManager (CRM, Prospect, Sales Force Management) and eDocs (Integrated Digital Imaging and Storage).

All development effort is being committed to a continual product improvement process so all clients in all markets receive the functional and technological improvements of an award winning, large scale, continual development effort.
