For Immediate Release**

## ***CargoWise™ edi Tapped to Implement Global Enterprise Solution for Pactrans Air & Sea Inc.***

*ediEnterprise Platform Will Create Operational Efficiencies for all Departments, Offices*

**Chicago, IL USA, October 4, 2007** — CargoWise™ edi, a leading provider of integrated international supply chain logistics management systems, has been selected to implement a global enterprise solution for Pactrans Air & Sea, Inc. that streamlines its operations and increases logistics management efficiencies by providing a platform that integrates all departments and offices throughout the company.

An international freight forwarder, Pactrans Air & Sea, was using a number of fragmented solutions across several departments with inadequate operational efficiencies. Additionally, there was no sales system in place to leverage and manage sales efforts and Standing Operating Procedures (SOPs). By implementing its *ediEnterprise* solution into a single platform, CargoWise edi was able to integrate all departments and offices throughout Pactrans Air & Sea, including accounting and sales.

CargoWise edi's *ediEnterprise* system is a highly modular enterprise-class structure designed to automate and streamline the operations and management of international supply chain service providers. In doing so, it supports and automates the highly fragmented logistics process that is used by supply chain service providers worldwide. *ediEnterprise* draws all of these disparate processes together to give the operator instant access to information and offer management transparent oversight of operations at all times.

"We are excited to see companies such as Pactrans Air & Sea become more efficient in its operations using CargoWise edi software," said Cris Arens, Global Sales Director of CargoWise edi. "Individual departments will be better served while also reaping the benefits of being tied into a single global system, which enables improved communications and operational efficiencies and sales across all offices."

Pactrans Air & Sea is a U.S. - based company with operations in multiple countries. Due to the success of the initial implementation phase of CargoWise edi's *ediEnterprise* solution, the company now plans a major initiative to implement the global system into its China office in the near future in order to further streamline processes between its global offices.
