

CargoWise Approved As CNS Partner In UK

- CargoWise's ediEnterprise Offers Customers a Single, Robust Connection to CNS -

Milton Keynes, UK, February 15, 2010 — CargoWise®, a globally recognized technology supplier for logistics service providers, has recently been approved as an official partner of Community Network Services (CNS), one of the major Community Systems Providers (CSPs) in the UK. CNS provides inventory management and customs clearance to shipping lines, ports, freight forwarders and haulers. CNS also facilitates connectivity to the customs entry processing system known as CHIEF (Customs Handling of Import and Export Freight) for the ports of Southampton, Tilbury, London and Immingham.

CargoWise was among the first to integrate its ediEnterprise software solution with CNS's container status messaging system for Inland Container Depots (ICDs), and is now among the first to link to its new CHIEF Customer Message Interface (CCMI) product and Mailbox service. The CCMI enables CargoWise's ediEnterprise to communicate with CHIEF and is plugged into CNS's new Compass product for inventory pre-checks, while the Mailbox service is used for the retrieval of CHIEF- and CNS-generated report prints.

Daniel Clarke, Senior Developer, EMEA Products, for CargoWise said: "We are pleased to offer this new functionality in partnership with CNS. The CNS approval validates ediEnterprise's capability in transmitting to CCMI for import and export, inventory and non-inventory jobs, receiving the response, and retrieving and acknowledging prints. The advantages of this partnership will provide our clients with a more robust connection to CNS. The transfer of data is much faster, processing in a few seconds for a round trip, rather than taking minutes. It also eliminates the need for subscriptions with another provider, as ediEnterprise is a single, stand-alone application."

ABOUT CARGOWISE®

CargoWise is a globally renowned technology provider that delivers an innovative, single platform solution to improve customers' visibility, efficiency, quality of service and profitability. It provides dynamic and efficient solutions for logistics service providers focused on effortless supply chain execution capability in an integrated globally capable enterprise system.

Every day, 1,300 logistics service providers, consisting of 33,000 users in 45 countries, move goods through the global supply chain using CargoWise's ediEnterprise system, a powerful and feature rich software solution developed to meet the ever-changing needs of the logistics industry. CargoWise offers the only single platform supply chain logistics management system that provides integration across all departments and functionality for domestic, regional and global customers.
